Strengths not utilised

- Hard- working
- Flexible
- With organisational skills

Membership of other organisations

- Member of EWMA
- Member of ICC

My vision for the Education Committee in the following years

From 2021 to 2023, I chaired the EPUAP Education Committee. With individual team members, we have launched and jointly implemented several successful plans and activities. These included the preparation and active involvement in sessions and workshops for the EPUAP Annual Meetings, the STOP Pressure Ulcers campaign, the content development of the committee's website, and many others where I highlight the work of individual committee members working together as a team. An important project was the EPUAP Pressure Ulcer Curriculum, initiated by Andrea Pokorná and Paulo

Alvez, started by Steven Smet and his team at the time of his previous chairing, which I subsequently completed and brought to a successful publication. One of the important reasons for my candidacy is to continue to prepare and process the dissemination of the EPUAP PU Curriculum. In this project, as well as in other activities of the EPUAP Educational Committee, I would like to actively continue as a team leader with a transparent and fair approach to individual members, recognizing their qualities, so that the excellent ideas of team members become reality. I highly value the work of the of previous and current Chairs and their teams, so my goal is to continue quality projects and activities in the future. I believe that I can lead and bring activities to a successful course to reach a successful conclusion.
