**Please comment on your involvement with pressure ulcers under the following headings:**

**Clinical:** I'm not directly involved in clinical care, but collaborate with/supervise quality improvement projects at the university hospital.

**Scientific research:** I have a strong research interest in maintaining skin and tissue health, in evidence-based practice and guideline development. I support the International Guidelines for Prevention and Treatment of Pressure Injuries since 2011.

**Organisational:** I was EPUAP trustee and president, work currently in a number of national and international societies and boards.

**Educational:** I teach at my university including pressure ulcer management, the EPUAP Master Class and many more.

**Strengths not utilised:** I could write more applications for research funding, but because of my position I don't get enough time to do that.

**Membership of other organisations:** German Society of Nursing Science, Initiative for Chronic Wounds, EWMA, Cochrane Skin, CHORD COUSIN Collaboration (C3)
