

Dear colleagues,

I would like to share the successful event held at São Luiz Gonzaga Hospital in commemoration of World Pressure Injury Prevention Day. We celebrated the 12th International Day for the Prevention of Pressure Injuries on November 10th and 13th, 2025.

The event was highly interactive, featuring a challenge where participants competed to assemble a puzzle highlighting preventive measures. The winner received a prize, and every participant received a small bag of candy. It was an enriching activity that effectively emphasized the importance of prevention.

We saw participation from 166 employees, including nurses, nursing assistants and technicians, as well as nutritionists, kitchen assistants, physiotherapists, and other professionals.

Sincerely,
Heloisa Carbonari Freire Braga
