### **Stop Pressure Ulcer Day**

Mirjana Meštrović<sup>1</sup>, Jelena Slijepčević<sup>2</sup>

This year, the University Hospital Center (UHC) Zagreb joined the global initiative to mark „Stop Pressure Ulcer Day“ organizing an expert symposium "Why is it important to talk about pressure ulcers?". The event was held on November 20, 2025 in UHC Zagreb, organized by the Nursing and Health Care Service and the Department for Quality Assurance and Improvement of Health Care.

In addition to nurses and technicians from KBC Zagreb, the symposium was also attended by students from the Mlinarska Medical School, who, accompanied by their professors, had the opportunity to learn about current approaches to pressure ulcer prevention. After the introductory presentation, three more expert lectures were held dedicated to the challenges in everyday clinical practice, specificities in care, and the importance of timely and effective prevention of this significant health problem.

With this, UHC Zagreb once again confirmed its commitment to education and the promotion of high standards of health care.
